Producent	VQ-Models

Opis produktu

SONEX EDF 70mm (EDF 70mm)

The **SubSonex** is an experimental, single-place, amateur-built jet from Sonex Aircraft's "Hornet's Nest" development division. The aircraft is often referred to in the industry as a "microjet". The SubSonex is single engine, jet aircraft similar in design to an Onex, with a Waix style Y tail. It was introduced at AirVenture 2009. It is powered by a Czech-built PBS TJ-100 turbojet engine mounted above the aft fuselage, with the exhaust exiting between the Y-tail.

Now VQ introduces the ARF SubSonex with EDF 70mm and it is the first VQ EDF model . It was design with very light weight and use as a first jet trainer.

Specifications:

- Wingspan: 1400mm (55.12in.)
- Fuselage lenght: 1290mm (50.79in.)
- Weight (ready to fly): 2.3kg - 2.4kg
- Electric motor: EDF 70mm - 2750kw
- Battery: Lipo 14,8V - 4500mAh
- Radio req: 6 channels with 6 servos
(6 x 19gramns servos /
7 channels with option E-retract)
